APPLICATION

CE30SA75 Spark Arresting series is a high performance reactive silencer recommended for those conditions where the ambient noise level in the environment is very low, particularly where stringent noise criterion is demanded and type approval is compulsory. For use with two and four cycle engines.

PERFORMANCE

Attenuation of up to 30dba is attained from the outlet of CE30SA75 / CE30SA75S range of silencers under open-field conditions.

FEATURES

- Mild steel body with choice of flanges (JIS, ANSI, PN10, Table D, etc.)
- Coated with heat-resistant aluminum paint (Up to 600°C) Sandblasting Optional
- Can be mounted either vertically or horizontally without affecting performance
- Choice of materials of construction (MS, SS304, SS316, etc.)
- Modifications and other sizes available upon request
